

Medical tourism in the Yaroslavl Regional Perinatal Center

About us

The state budgetary institution of the Yaroslavl region “Regional Perinatal Center” opened its doors to patients on July 12, 2011.

Today it is the largest Perinatal Center in the region, which provides specialized and high-tech medical care in obstetrics and gynecology, including the provision of assisted reproductive technologies (ART). All departments of the Center are equipped with advanced medical equipment, the park of which is regularly updated. Our staff is highly qualified specialists with modern knowledge and the latest technology.

More than 2000 gynecological surgeries are performed at the Center annually, 87% of high-level surgeries. Every year we carry out more than 450 cycles of IVF, the effectiveness of which is 30%.

All our patients are provided with comfortable conditions of stay and staff support during their stay in the clinic.

We invite you to undergo examination and treatment in comfortable conditions for patients from all regions of the Russian Federation, as well as foreign citizens.

With care for mother and baby!

Our advantages

High professionalism

All our specialists own a full range of modern techniques of operative gynecology and ART, regularly undergo training at the leading Russian and foreign clinics, participate in international seminars and conferences

Modern equipment

We work on the equipment of world leaders: Karl Storz endoscopic racks, Aesculap laparoscopic instruments, Medtronic ultrasonic dissectors, ORIGIO laminar flow cabinets, Binder incubators, Nikon Eclipse Ti2 microscope with Eppendorf micromanipulation system

Individual approach

Our patients undergo treatment in single and double rooms, always surrounded by care and attention, staff with knowledge of the English language participate in the treatment.
